

THE VERIFICATION LAYER

— SEALED WITH APIR, KEPT WITH THE WILL

ASSET REGISTER

Digital assets and valuables

PRIVATE

Register of Digital Assets and Valuables

Prepared for sealing with APIR. Kept with the will. Fill it in on screen, save it, and seal that exact file.

NAME	
FIRM AND MATTER REFERENCE	
DATE OF THE WILL THIS SITS WITH	
WHERE THE WILL IS HELD	
DATE THIS REGISTER WAS COMPLETED	
VERSION	1

Never write a password, seed phrase, recovery phrase, private key, PIN or recovery code anywhere in this register. Write *where* the means of access is kept and who holds it. This document sits with the will, and executors and beneficiaries will read it. A register that holds the keys is a register that hands them to whoever opens the envelope first.

This register records what exists, where it sits and where access is kept. It is not a will, does not change who inherits anything, and is not legal advice. The will governs.

Cryptocurrency and digital assets

PART 01

Exchange accounts, self-custody wallets, hardware wallets, tokens, NFTs.

WHAT IT IS	WHERE IT SITS	ACCOUNT IDENTIFIER (NEVER A PASSWORD)	WHERE ACCESS IS KEPT	WHAT THE EXECUTOR SHOULD DO

Domain names and websites

PART 02

DOMAIN OR SITE	REGISTRAR OR HOST	ACCOUNT EMAIL	RENEWAL DATE	WHAT SHOULD HAPPEN TO IT

Online business accounts and income

PART 03

Payment processors, marketplace seller accounts, advertising accounts, affiliate programmes, royalties, anything that pays money in.

ACCOUNT	PROVIDER	ACCOUNT IDENTIFIER	ROUGHLY WHAT IT EARNs OR HOLDS	WHAT THE EXECUTOR SHOULD DO

Money held only online

PART 04

Accounts with no branch and no paper statements: app based banks, investment and trading apps, payment wallets.

ACCOUNT	PROVIDER	ACCOUNT IDENTIFIER	WHERE ACCESS IS KEPT	NOTES

Email, cloud storage and photos

PART 05

SERVICE	ACCOUNT	WHAT IS IN IT	KEEP, HAND OVER, OR CLOSE	NOTES

Subscriptions that bill

PART 06

So nothing keeps charging the estate.

SERVICE	BILLED TO (CARD OR ACCOUNT)	ROUGHLY HOW MUCH	CANCEL OR TRANSFER

Social and messaging accounts

PART 07

PLATFORM	ACCOUNT	CLOSE, MEMORIALISE, OR HAND TO SOMEONE	WHO

Devices

PART 08

Phones, computers, tablets, hardware wallets, drives.

DEVICE	WHERE IT IS KEPT	WHERE THE UNLOCK CODE IS KEPT (NEVER THE CODE)	ANYTHING ON IT THAT MATTERS

Password manager

PART 09

If one is used, this is the most important line in the register.

PASSWORD MANAGER	ACCOUNT	WHERE THE EMERGENCY ACCESS OR RECOVERY KIT IS KEPT	WHO HOLDS IT

Valuables

PART 10

Jewellery, watches, art, collections, heirlooms: things of value that are not digital.

ITEM	WHERE IT IS KEPT	PAPERWORK (RECEIPT, VALUATION, CERTIFICATE) AND WHERE IT IS KEPT	PHOTOGRAPHS SEALED (THE SEAL LINK)	NOTES

Photograph each item and seal the photographs with its paperwork at apir.ai/seal (What it is: *Physical asset or object*, or *Collectable*). The seal dates the photographs and the papers. APIR does not inspect the item or say what it is worth. Write the seal link in the table.

Anything else

PART 11

WHAT IT IS	WHERE IT SITS	WHERE ACCESS IS KEPT	NOTES

Who should deal with these first

CONTACT

A name, and how to reach them. The will says who has authority; this line only says who knows the most.

Before it is sealed

SEALING

- 1 **Search the file** for "password", "seed", "phrase", "PIN" and "key". None of them should be followed by the thing itself.
- 2 **Save the final version as a PDF** and stop editing. The seal fingerprints that exact file. Opening it and saving it again, even with no visible change, can make it a different file, and a different file will not check.
- 3 **Seal it.** Either the firm registers it for the client, and the certificate names the firm and the matter reference, never the client. Or the client seals it free at apir.ai/seal: What it is *Document or manuscript*; How it was made *Made by a person, with software tools*; Title *Asset register, matter [reference]*; Name as it will print: the matter reference if the client prefers not to be named; Declaration: one line, for example *My register of digital assets and valuables, completed on [date], to sit with my will dated [date]*.
- 4 **Know what is public.** The seal page is visible to anyone holding its link, and shows the name, the title, the declaration and the file name. It is not listed or searchable anywhere, and the register itself is never sent to APIR, only its fingerprint.
- 5 **Print the certificate** from the seal page (Save as PDF) and file it with the will, beside the sealed register.
- 6 **Keep the exact sealed file** in two places: with the will, and on the firm's file.

When something changes

VERSIONS

A sealed register is never edited. Complete a new version, bump the version number, seal it, and file it with the will beside the old one. Both stay checkable, each with its own date, and the latest date is the latest word.
